

COUNTY OF RIVERSIDE DEPARTMENT OF ENVIRONMENTAL HEALTH

UNIVERSAL WASTE HANDLING

Universal Wastes include the following:

- | | |
|--|--|
| Waste Fluorescent light tubes, lamps and ballasts | Waste Mercury Thermostats |
| All waste dry-cell batteries | Anything containing Mercury that is a waste |
| (AA, AAA, C, D, Lithium, Nickel-Cadmium, rechargeable, etc.) | Waste televisions and computer monitors (CRTs) |
| Various electronic devices (fax machines, cell phones, etc.) | Non-empty aerosol cans |

General requirements for ALL businesses who generate Universal Waste

1. **DO NOT DISPOSE OF ANY UNIVERSAL WASTES INTO THE TRASH.** As a business, you are required to recycle any universal wastes generated onsite.
2. **Do not disassemble or treat universal waste** except under certain provisions allowed under applicable sections of Title 22 of the California Code of Regulations.
3. You may opt to have a company pick up your universal waste or you may self transport your universal waste to a collector or recycler of universal waste.

General requirements for businesses who generate more than 100kg (220 lbs) of Universal Waste in a calendar month (excluding CRT weight which must be less than 5 CRTs in a calendar year)

1. You may accumulate universal wastes onsite for one calendar year prior to recycling.
2. While onsite, your universal waste must be in a container that can hold the contents and be closed. That could be any container that can hold the universal waste and protect it from breakage or leaking; a cardboard box for light tubes, a coffee can with lid for alkaline batteries, a drum for non-empty aerosol cans, or a pallet with CRTs that is shrink wrapped may be used for example.
3. Each container with universal waste must be labeled (or marked on) with the type of universal waste, date of accumulation and the name of the generator.

Example:

• Universal Waste:	<u>Light Tubes</u>
• Accumulation Start:	<u>06/10/2005</u>
• Joe's Auto Repair	

4. Keep all of your receipts showing what you did with your universal wastes for three years. You are required to have them upon request for inspection. You may also keep a log detailing UW shipments.
5. Immediately respond to any breakage or releases of universal wastes. You may not intentionally break any universal wastes.
6. Inform all employees of proper handling requirements.
7. Notify the CUPA if you plan to puncture non-empty aerosol cans before you start the practice.
8. Notify DTSC and the CUPA if you intend to treat any universal waste onsite.
9. Notify the CUPA four weeks prior to any planned foreign export of universal wastes.
10. Businesses accumulating more than 5,000 kg of universal waste at any one time or more than 5 CRTs in a year are subject to additional requirements. Contact the CUPA for more information.

For questions, contact the Hazardous Materials Management Division (CUPA). For a list of transporters and/or facilities accepting universal wastes, see page 2 of this guideline.
