

NOTICE OF PROPOSED CORRECTIVE ACTION PLAN

DATE: 7/27/06

SITE: Former Cathedral City Shell
69010 Hwy. 111
Cathedral City
LOP Site #200420469

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that soil vapor extraction is being proposed as a corrective action to remediate the gasoline originating from the former underground storage tanks at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

It is anticipated that the plan for corrective action will be implemented by September 3, 2006. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Linda D. Shurlow at (760) 863-8976 or Sharon Boltinghouse at (951) 358-5055.
