

NOTICE OF PROPOSED CORRECTIVE ACTION PLAN

DATE: April 23, 2007

SITE: Thrifty #343
4395 Market Street
Riverside, California
Site # 980442

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that soil and groundwater extraction were proposed as a corrective action to mitigate the gasoline originating from the underground storage tank system at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

An interim remedial action plan was initiated December 2003 and the plan for corrective action was implemented in March 2007. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Sharon Boltinghouse at (951) 955-8982.
