

NOTICE OF PROPOSED CORRECTIVE ACTION PLAN

DATE: September 18, 2007

SITE: Mobil Station 18-HVR
9505 Magnolia Avenue
Riverside, California
Site # 200522145

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that soil vapor extraction was proposed as a corrective action to mitigate the gasoline originating from the underground storage tank system at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

A remedial action plan was accepted September 18, 2007 and the plan for corrective action is to be implemented by December 21, 2007. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Sharon Boltinghouse at (951) 955-8982.
