

NOTICE OF PROPOSED CORRECTIVE ACTION PLAN

DATE: **October 24, 2008**

SITE: **Shell Oil
10171 Mission Blvd
Riverside/Glen Avon, California
Site # 200723550**

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that short-term soil vapor extraction is proposed as a corrective action to remediate the gasoline originating from the underground storage tank system at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

The plan for corrective action will be implemented in November 2008. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Sharon Boltinghouse at (951) 955-8982.
