

NOTICE OF PROPOSED CORRECTIVE ACTION PLAN

DATE: September 17, 2007

SITE: Shell Service Station
15980 Perris Boulevard
Moreno Valley, California
Site # 200420313

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that soil vapor extraction and air sparging were proposed as a corrective action to mitigate the gasoline originating from the underground storage tank system at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

A remedial action plan was accepted September 17, 2007 and the plan for corrective action is to be implemented by December 21, 2007. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Sharon Boltinghouse at (951) 955-8982.
