

## **NOTICE OF PROPOSED CORRECTIVE ACTION PLAN**

**DATE:** February 22, 2007

**SITE:** Western Municipal Water District  
16451 El Sobrante Road  
Riverside, California  
Site # 94897

In accordance with Title 23, Section 2728 of the California Code of Regulations, this public notification is being issued to advise interested parties that soil vapor extraction and groundwater pump and treat were proposed as a corrective action to remediate the gasoline originating from the underground storage tank system at the above site. No adverse environmental effects are anticipated by this remediation treatment.

There is no indication at this time that public drinking water wells have been impacted.

The plan for corrective action was implemented in June 2005. The date of completion is not specified at this time since completion will be dependent on verification analyses showing levels within regulatory compliance.

The Riverside County Department of Environmental Health Local Oversight Program is overseeing the investigation and remedial action at this site. For further information, contact Sharon Boltinghouse at (951) 955-8982.
